Porulur, Ottanchatram, Dindigul – 624616

OBJECTIVE

Creative and results-driven **React .NET Full Stack Developer** with hands-on experience in building responsive, user-friendly web applications using **HTML, CSS, JavaScript, React, and Bootstrap** on the frontend, combined with strong expertise in **C# and ASP.NET Core** for backend development. Skilled in designing and consuming **RESTful APIs** and seamlessly integrating frontend interfaces with robust server-side logic. Proficient in working with relational databases such as **MySQL** and **Microsoft SQL Server**, performing CRUD operations, query optimization, and basic schema design. Adept at applying UI/UX principles, following the Software Development Life Cycle (SDLC), and delivering clean, maintainable, and scalable code that enhances both performance and user experience across the full stack.

INTERNSHIP EXPERIENCE

React .NET Full Stack Developer Intern, Anaiyaan Technologies, Palani July 2025 - Present

- Working on full-stack web application development using **React** for frontend and **ASP.NET Core** for backend.
- Developing and consuming **RESTful APIs** to integrate frontend components with server-side logic.
- Collaborating with senior developers in **Agile** development cycles and participating in code reviews and testing.

Full Stack Developer Trainee, Besant Technologies, Velachery October 2024 - May 2025

- Completed Full Stack .Net Development training covering **(C#), REST APIs, and React**.
- Implemented responsive designs and performed cross-browser testing to ensure consistent UI/UX.
- Built mock projects integrating React with backend services.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript

.NET Core: ASP.NET Core, Console Applications, MVC Applications, Web API 8, **Entity Framework Core**, **Dapper**

Databases: Microsoft SQL Server, MySQL

Frontend Framework: React 19

Web Technologies: HTML, CSS, Bootstrap

IDE & Editors: Visual Studio 2019, Visual Studio 2022, Visual Studio Code

Source Control: GitHub

REST Clients: Postman, Swagger

SQL Clients: SQL Server Management Studio (SSMS), MySQL Workbench

EDUCATION

- **Bannari Amman Institute of Technology** (2020 – 2024) B.E. Computer Science and Engineering | CGPA: 8.42
- **Veveaham Hr Sec School** (2019 – 2020) HSC | Percentage: 70
- **Veveaham Hr Sec School** (2017 – 2018) SSLC | Percentage: 86

PROJECTS

Service Application (MrLookup.com)

[\[Live Link\]](#)

- **MrLookup** is a customer-facing web application designed to connect rural and semi-urban users with individual micro and mini service providers such as **mechanics, plumbers, electricians, painters, and drivers**.
- Enables users to **search and discover nearby service providers online** quickly and easily, improving accessibility for local services.
- Implemented **geo-location based search** to identify and display nearby service providers based on the customer's location and required service.
- Integrated an **admin validation and approval workflow** to verify service providers before publishing them to the public platform, ensuring trust and service quality.
- Designed a **responsive and user-friendly interface** optimized for mobile and low-bandwidth environments, suitable for rural users.
- **Technologies Used:** React.js, Bootstrap 5, ASP.NET Core Web API 8, MySQL, Azure Cloud.

E-commerce Platform (OllirOrganics.com)

[\[Live Link\]](#)

- Developed a full-fledged e-commerce platform using **React and Web API** for Ollir Organics, implementing key features like **product listings, category filtering, and shopping cart functionality**.
- Implemented **responsive design** to ensure a consistent and optimized experience across desktop, tablet, and mobile devices.
- Established communication with the backend (e.g., a RESTful API) to fetch product data, manage cart states, and submit orders, ensuring real-time data accuracy.

Milk Delivery Management System (4K Fresh)

[\[Live Link\]](#)

- Developed a role-based **Milk Delivery Management System** for **4K Fresh** to manage daily milk deliveries, customer subscriptions, order cancellations, and automated bill generation.
- Implemented **user management and delivery tracking** features with multiple roles (Admin, Delivery Staff, Customer), each having distinct access and functionalities.
- Built scalable backend services using **ASP.NET Core 8 (MVC & Web API)** integrated with **MySQL**, ensuring reliable data handling, secure operations, and real-time delivery updates.
- **Technologies Used:** .Net Core 8, MVC , Web API and MySQL .

INTERNSHIP EXERCISE SAMPLES

- **MVC Student CRUD Application** – Developed a basic CRUD application using **ASP.NET Core MVC** for managing student records, including create, update, delete, and view operations. [\[GitHub Link\]](#)
- **Web API CRUD Services** – Built RESTful CRUD APIs using **ASP.NET Core Web API**, implementing proper HTTP methods and tested endpoints using **Postman** and **Swagger**. [\[GitHub Link\]](#)
- **Scheduled Jobs – Console Application** – Created a **C# Console Application** to execute scheduled background jobs and automated tasks, focusing on application flow and exception handling. [\[GitHub Link\]](#)
- **Ravon Road Logistics Website** – Developed a responsive logistics business website with a focus on clean UI, performance, and deployment, providing company service information online. [\[Live Link\]](#)

CERTIFICATIONS

- Front-End Web Development – [Udemy](#)
